# Smart Pool

Enhance Customer Experience

Nuvis Technologies is introducing an innovative Smart Pool system based on computer vision and artificial intelligence technologies to help provide wholesome customer experience to swimmers and visitors, reduce chemical pollution while reducing pool operating costs.

The system also helps predict the customer demand and revenues.

About Us

Nuvis Technologies provides leading edge technology solutions based on Computer Vision, Artificial Intelligence, Block Chain, and IOT.

Our solutions include Smart Pool, Smart Ski, Smart Park, Smart Marina, Smart Space, Smart Traffic, and several Smart City application.

These are cloud solutions and eliminates the need for IT infrastructure and IT staff.

System Features

Our system helps:

- Automatically count the number of people in the pool and adjust the chemicals and pumping
- Display the swimmer count in the pool
- Ability for customers to select less crowded pools from the mobile app
- Predict pool usage on any given day/time based on historical data and weather
- Display hot tubs usage
- Extensive real time data and analysis of historical data to improve the management and optimization of swimming pools, and prediction of business and revenue potential based on history and weather.
- ROI – operating cost savings pay for the system

Customers and Management can access the data through their Smart Phone App, and Tablets.
